

PRomovia

Intra-joints injections based on sodium hyaluronate

- Pre-filled syringes containing **hyaluronic acid-based** gels that provide joint cushioning
- **Innovative topical formulation** and massage gel specifically designed for areas of the body that experience pain, discomfort or muscle fatigue
- **Food supplement** that is designed to promote overall well-being and reduce osteoarthritic knee symptoms

PROMOVIA

Highlights

Promovia[®] Family

Joint damage often results from cartilage degeneration, causing pain and restricted movement.

Various therapeutic methods include non-pharmacological treatments, systemic medication, local drug therapy, and viscosupplementation with hyaluronic acid.

Hyaluronic acid provides **lubrication, trophic support, and restoration of the intra-articular environment**, along with several biological effects that suppress inflammation and protect against cartilage degradation. Innate developed the **Promovia[®] family** of products, **including infiltrative solutions and topical treatments** to enhance the quality of life for patients with joint damage. These products aim to alleviate pain and improve overall well-being in individuals affected by joint disorders.

Promovia[®] Injections

Promovia[®] is an injectable product that contains highly purified hyaluronic acid with viscoelastic properties. **It is available in pre-filled, single-use glass syringes with a sterile solution.** Medium molecular weight hyaluronic acid (about 1.2 and 1.5 MDa) in Promovia[®] is obtained through biofermentation techniques, ensuring purity without chemical processes or alterations. The Promovia[®] family includes syringes with different concentrations and volumes for treating various joints and levels of the disorder.

Medical Device Class III

CE Mark 1984

Intended use: Chondropathy, Arthrosis, Arthritis.

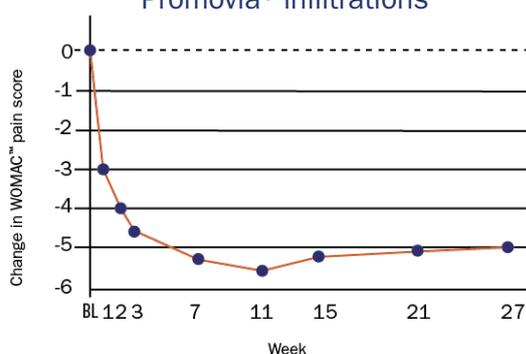

Classification: Implantable, non-active, re-absorbable, long term (>30 days) medical device.

Formats available: Promovia® 2: in 24mg/2mL and 40mg/2mL and Promovia® 4: 60mg/4mL and 80mg/4mL.

Clinical evaluation

Therapeutic effect after 3 Promovia® infiltrations

The graph shows that the Promovia® treatment cycle was effective in reducing pain from the very first injection. After the three suggested injections, the range of motion (both flexor and extensor) may increase as pain perception is decreased.

Promovia® Cream

Cosmetic product: 30 ml/tube

Is designed for massaging the areas of the body prone to mechanical stress, like knee and shoulder. Its natural ingredients, including camphor, capsaicin, St. John's Wort, and Arnica montana extracts, provide long-lasting relief from joint discomfort with an immediate sensation of freshness. Simply massage until fully absorbed.

Promovia® Gel

Cosmetic product: 100 ml/tube

Is a powerful solution for relieving large areas of the body experiencing mechanical stress. With its blend of essential oils and botanical extracts like camphor and menthol, the gel delivers an instant cooling effect and relief upon application. Simply apply the gel to the affected area and gently massage as needed for optimal results.

PROMOVIA

Commercial Informations

PROMOVIA® Injectables

Format: 1 pre-filled syringe per unit

Indication of Use: Single shot or multiple shots following medical administration advice

Shelf Life: 36 months

Minimum order quantity: 500 units

PROMOVIA® Cream

Format: 30 mL/tube

Indication of Use: Gently massage as needed on the affected area until absorbed

P.A.O.: 9 months

Minimum order quantity: 660 units

PROMOVIA® Gel

Format: 100 mL/tube

Indication of Use: Spread as needed on the affected area until absorbed

P.A.O.: 9 months

Minimum order quantity: 225 units
